Letter of Attestation for the COM2000S

This is letter is to attest to the fact that the COM2000S has not changed since the unit has been tested. . A Class II Permissive Change is requested for this device to change the necessary bandwidth and emission designator to reflect a 12.5 kHz channel width as per FCC narrowband requirements. No changes to the device were necessary to meet the 12.5 kHz channel requirements.
