

Audio Frequency Response

Tabulated below are the audio frequency response measurements.

Frequency	Amplitude (dB)
50	-0.5
100	-0.5
400	0.0
1000	0.9
2000	2.6
5000	7.8
10000	13.0
15000	16.0

The frequency response data is graphed below. One can see that it follows the 75 μ s pre-emphasis characteristics.
