

CIRCUIT DESCRIPTION

1000BT Portable transmitter

type of emission : FM (F3E)

Antenna : Built-in antenna

Microphone unit : ECM and dynamic

Battery : 9VDC

Oscillation method : PLL synthesizer

Frequency range : 723.000 - 735.000MHz

Number of channel : 121 channels (100KHz step from 723.000MHz)

Noise reduction : compressor (log 2:1)

1000BT is also a portable type transmitter and it operates a 9V battery. Its

antenna is

also built-in, nondetachable type. There is one PCB inside and its ground

lines are

located in the PCB itself.
