Equipment Authorization Division  
Office Of Engineering Technology  
Federal Communications Commission  
7435 Oakland Mills Road  
Columbus, MD 21046

Ref: BZB15HT

Dear Sirs:

Azden Corp. requests acceptance of the labeling proposed described below for its transmitter identified as BZB15HT. The subject is a handheld UHF band wireless transmitter shown in figure 1.

Figure 1.

Because the transmitter is composed of operating controls and battery access cover, and because the housing is round and would allow the label to be easily removed

during handling we feel that attaching the label inside and on the back side of the battery compartment is the best location.

The consumer packaging for this model requires the user to remove the battery cover to insert the batteries making the label readily visible to the user and its placement assures that it will remain in place as it is protected from physical abuse during the life of the device.

Sincerely;

A handwritten signature in black ink, appearing to read 'T. Tokitomo', is written over a light blue circular stamp.

Toyohiko Tokitomo  
General Manager
