Re. FCC ID: BZB30HT – Label Location

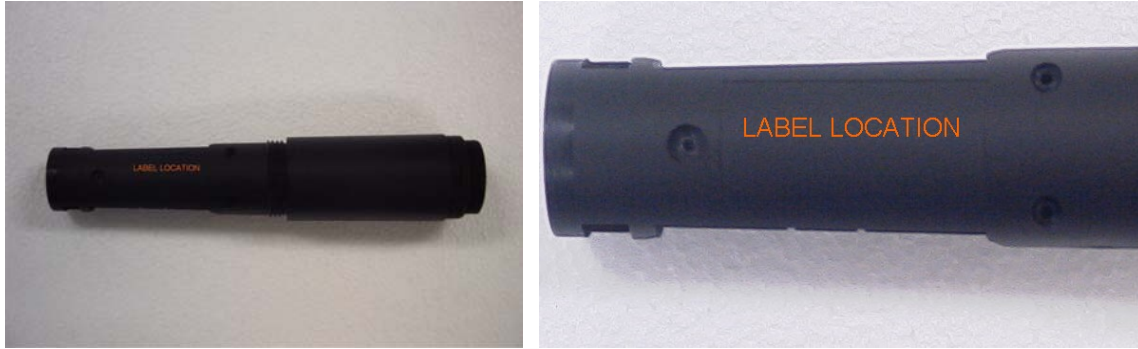

To Whom It May Concern:

We request acceptance of the labeling proposal described below bearing FCC ID: BZB30HT.

The device is a handheld wireless microphone as shown in the photos below. They will be certified under FCC rules and regulations Part 74.

Because of the type of device, there is limited space to attach the required label carrying the FCC Identifier. Attaching the label to the battery cover is not acceptable because the battery cover is a removable item. For this reason, we propose placing the label carrying the FCC ID inside the handle on the outside of the battery compartment as shown below.

The batteries are not installed in the wireless microphone and because of this, the FCC identifier would be readily visible to the user before the batteries are installed and whenever the batteries are removed or replaced. In this location, the label will also be protected from physical abuse and remain readable for the life of the device.

Sincerely,

Norman Levenstein
