

1516 Centre Circle, Downers Grove IL 60515

ANTENNA EXHIBIT			
Manufacturer Name	Winegard Company		
Manufacturer Address	3000 Kirkwood St, Burlington, IL		
Model No.	<p>Model numbers:</p> <ul style="list-style-type: none"> a. HS-SSET (superset, all features) b. HS-TMP1 (Buzzer, Temperature, humidity, accel) c. HS-PIR1 (Buzzer, accel, Motion, ambient light) d. HS-CC01 (Buzzer, Contact closure) e. HS-H201 (Buzzer, accel, temp/humidity, Water/Leak detector) 		
Specifications	<p>FCC "Code of Federal Regulations" Title 47 Part 2.1033(b)(4), 15.203, 15.212, 15.217, 15.219, 15.255 and 15.256 KDB 353028 D01 v01 f01 Industry Canada RSS-GEN</p>

Requirement	<p>All part 15 applications will need to show how the antenna gain was derived either from a manufacturer data sheet or a measurement.</p> <p>Where the gain of the antenna is inherently accounted for as a result of the measurement, such as field strength measurements on a part 15.249 or 15.231 device, so the gain does not necessarily need to be verified. However, enough information regarding the construction of the antenna shall be provided. Such information maybe photographs, length of wire antenna etc.</p> <p>The antenna gain information shall be made public (not confidential). Any proprietary information such as construction maybe stripped from the gain information report and held confidential. The main antenna information we require is the maximum gain of the antenna for the band of operation.</p> <p>This information must be provided as a data sheet or a measurement report.</p>		

1516 Centre Circle, Downers Grove IL 60515

The antenna is constructed of a copper trace on an FR4 substrate with 1 dBi Gain. See layout below. It is approximately 10mm by 3mm and it matched to the 50 Ohm transceiver through a matching network.

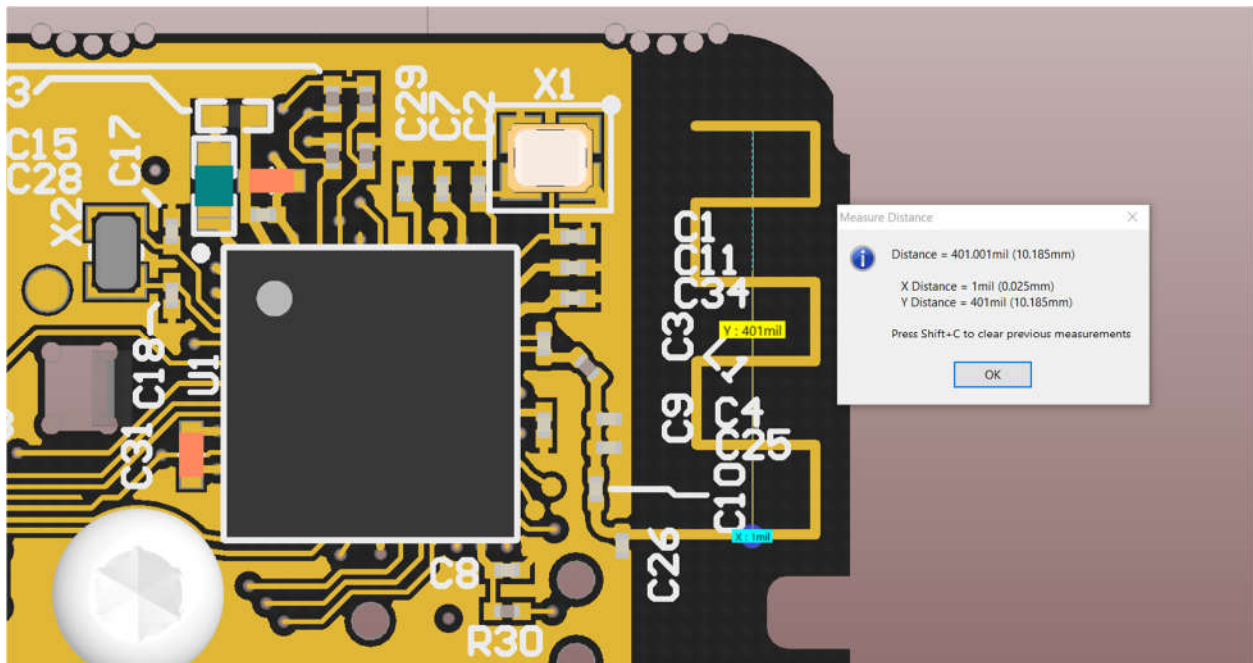

Figure 1. Antenna Layout and dimensions
