Swift Pair

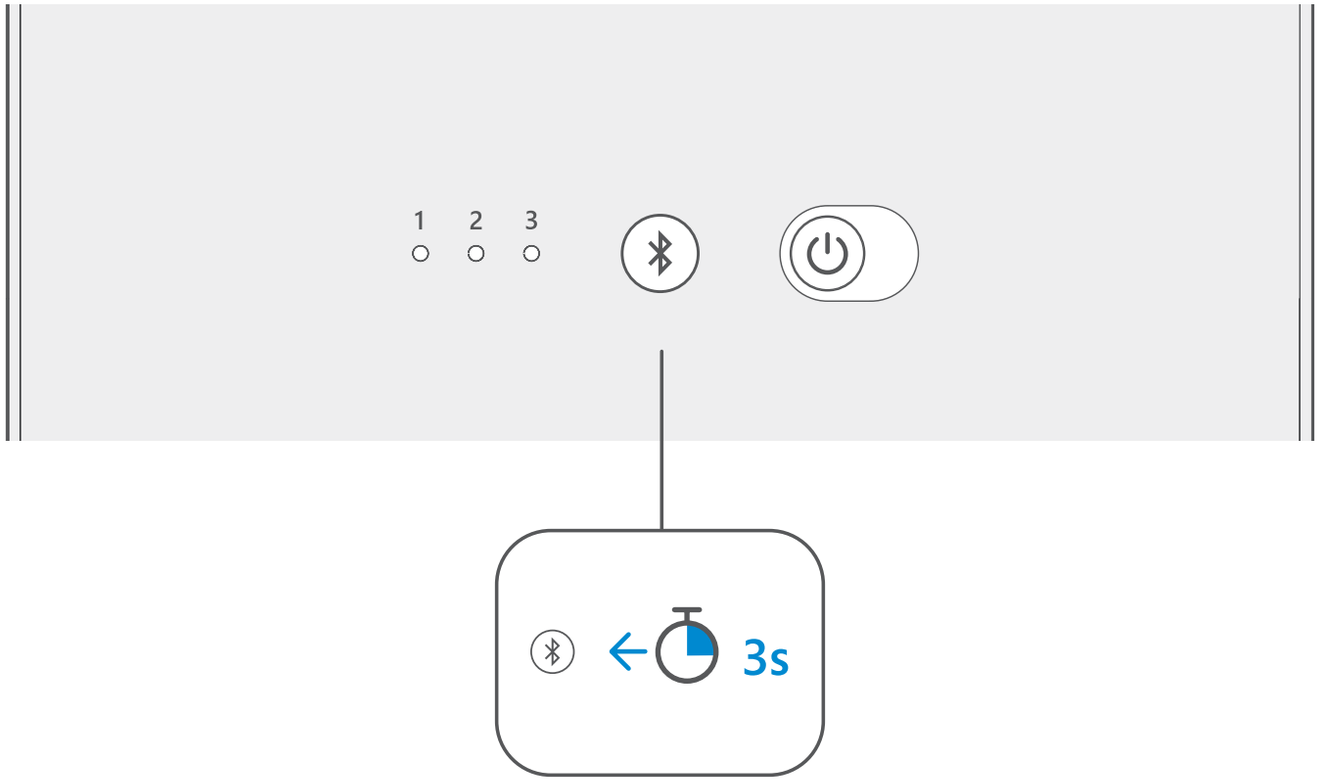
When you first turn on the number pad, it will go into pairing mode. For PCs that support Swift Pair*, a notification will pop up in the lower right corner saying that your number pad has been found. Select **Connect**.

Pairing manually

1 Press and hold the pair button for 3 seconds. The light will blink when it's ready to pair.

2 Open the Windows 10 **Start** menu, then select **Settings > Devices > Bluetooth & other devices > Add Bluetooth or other device > Bluetooth**.

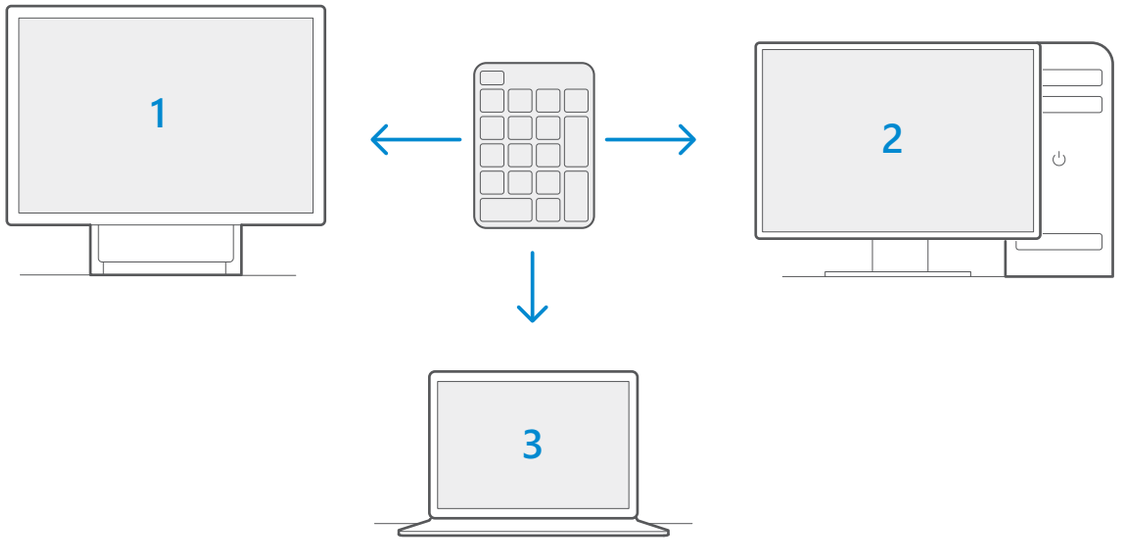
Select **Microsoft Number Pad**.



*Swift Pair is available on Windows 10 with the latest updates. For information about how to install the latest updates to Windows 10, visit **aka.ms/updatewindows**.

Pair up to 3 devices

The lights next to the pair button indicate which device is active. Press the pair button quickly to select a different device. Repeat the pairing steps from the previous page for each device.



Customize your keys

To customize the keys, install the Microsoft Mouse and Keyboard Center* at **aka.ms/MouseAndKeyboard.**

Stay healthy

Important safety information for your number pad, including information about musculoskeletal disorders (MSDs), is available at **aka.ms/KeyboardSafety**.

*Microsoft Mouse and Keyboard Center isn't compatible with Windows 10 in S mode.
