Subject: Cover Letter for FCC application for Certification of FCC ID: C3K2013

TO WHOM IT MAY CONCERN:

This model 2013 is notebook computer, which has certified radio module FCC ID : PD9AX201D2 inside. The original identification is C3K1983, which has been used as an Intermediate module for C3K2013 change of ID filing. The original grantee has confirmed that the antenna used is equivalent to the PIFA antenna approved under the original modular approval and therefore radiated spurious emissions are covered under the modular approval. We have performed the validation tests for module + host referenced in KDB 996369 D04.

Sincerely,

A handwritten signature in black ink, appearing to read "Kyle Chen".
