FCC ID: C3K2029

Microsoft Corporation attests that this device under FCC ID C3K2029 complies with the following device protocol requirements and operational restrictions for **indoor client 6XD**.

- 1) This device will only associate and connect with a low-power indoor access point or subordinate device and never directly connect to other client devices.
- 2) This device will always initiate transmission under the control of a low power indoor AP or subordinate except for brief transmissions before joining a network. These short messages will only occur if the client has detected an indoor AP or subordinate operating on a channel. These brief messages will have a time-out mechanism such that if it does not receive a response from an AP it will not continually repeat the request. 987594 D01 U-NII 6GHz General Requirements v01r03 19 d.
- 3) This device, when associated and connected with a low-power indoor access point, subordinate or standard access point device, will operate at a power lower than or equal to the power advertised by the low-power indoor access point or subordinate and never above the maximum output power allowed by the FCC grant for clients associated with indoor clients or subordinates.

We also acknowledge the following device restrictions:

a. This device is prohibited for control of or communications with unmanned aircraft systems, including drones.

This statement will be added to the regulatory e-content in the Device app at launch.

Sincerely,

A handwritten signature in black ink, appearing to read "Chaitrali".

Name: Chaitrali Limaye
