

Modular Approval Request Letter

02/21/2024

Dear Application Examiner,

Microsoft Corporation Model 2093, FCC ID: **C3K2093** would like to have your authorization as a modular approval specific to the mobile RF exposure condition.

The requirements of KDB 996369 have been met and shown on the following statements.

1. "The modular transmitter must have its own RF shielding." The radio portion of this module has been shielded, please see exhibition External Photo.
2. "The modular transmitter must have buffered modulation/data inputs." The EUT has buffered data inputs to ensure compliance with Part 15 requirements under conditions of excessive data rates or over-modulation. Please see the Schematics exhibit submitted in this application.
3. "The modular transmitter must have its own power supply regulation. The EUT has its own power supply regulation to ensure compliance with Part 15 requirements regardless of the quality or level of external DC supplying the module from the host unit. The technical report exhibit submitted in this application contains AC power line conducted emissions data taken with the EUT powered from a linear power supply that contains no EMC suppression components.
4. "The modular transmitter must comply with the antenna requirements of section 15.203 and 15.204(C)." The EUT meets the FCC antenna requirements. The spurious emission, unique antenna connector and photo of antennas are shown in the test report.
5. "The modular transmitter must be tested in a stand-alone configuration." This module is limited to specific Microsoft Host, authenticated and operated by non-alterable secure program code contained and controlled by the Host as described in the application exhibit.
6. "The modular transmitter must be labeled with its own FCC ID number." Please see exhibition Label Sample for the FCC ID of this module. The integration manual has instructions for the OEM on how to label the end product.

7. "The modular transmitter must comply with any specific rule or operating requirements applicable to the transmitter and the manufacturer must provide adequate instructions along with the module to explain any such requirements." The EUT is compliant with all applicable FCC rules. Detail instructions for maintaining compliance are given in the Users Manual.

8. "The modular transmitter must comply with any applicable RF exposure requirements." The EUT is compliant with all applicable RF exposure requirements. RF Exposure is addressed in the RF exposure exhibition.

Please contact me if you have any further questions. Thanks for your attention.

Best Regards,

Chaitrali Limaye
