Fax Number 		Total Pages 	1
Subject 	FAA Coordination letter	Date 	19 September 2002

Dear Mr. Leimer,

Further to our application for type acceptance and the conditions stipulated in the FAA Co-ordination letter, we agree to

- Disable the transmission capability in the frequency band 100 – 118MHz. This is achieved through an update to the firmware.
- Disable the FM selection. Again this is disabled through an update to the firmware.
- Disable the transmission capability in the band 328.6 – 335.4MHz. This is achieved through an update to the firmware.
- Disable the 8.33kHz channel selection. This is achieved in hardware via the Switch pack on the front panel BITE module (switch 6)

For all equipments provided marked with the FCC ID C8LB3060V2

Yours sincerely,

Allan Horsfield
