Reference FCC Filing for  
T6T HS 300 (C8LB63300HS)

Dear Sirs,

This application for certification was initiated in July 2006 and at that time it was intended to Certify two models under FCC ID's C8LB63200HS and C8LB63300HS and this is reflected in the positive response we received from Mr Frazier at the FAA.

We have since been advised that as the transmitter is made up from a number of amplifiers we do not need to use two different FCC ID's and therefore we request that any reference to C8LB63200HS should be disregarded and our application shall only be for FCC ID C8LB63300HS as a 300W transmitter.

Yours sincerely,

Allan Horsfield
