Wi-Fi / Bluetooth Functionality Statement

Dear Dan,

The TPDH5A Data Terminal Schematics , Parts List and Internal Photo information, submitted as exhibits, would show that this model has Wi-Fi / Bluetooth functionality available as a part of its design.

Tait Limited advises that the Wi-Fi / Bluetooth functionality has not been implemented at this first stage of certification, and has not been tested.

In the future, when we choose to implement the Wi-Fi / Bluetooth features, we will add the functionality in the normal manner, by Class 2 Permissive Change / Reassessment exercise.

Yours sincerely,

A handwritten signature in black ink, appearing to read "Des Fox".

Name: Des Fox
Title: Compliance Coordinator
