To whom it may concern

FCC ID: CASTEL 0036

PRODUCT: T2015-K27-F00

RF EXPOSURE:

This product is a "push to talk" vehicle mounted land mobile transceiver. According to the OET Bulletin 65 Ed 97-01 'evaluation for compliance is not required because the duty factors are generally low and, for mobile radios, because their antennas are normally mounted on the body of a vehicle' (see page 41).

See also OET Bulletin 56 dated August 1999 p25, 'in general, there is no evidence that there would be a safety hazard associated with exposure from vehicle-mounted, two-way antennas when the manufacturer's recommendations are followed'.
