

T2020 II User's Guide

T2020//

Safety Training Information

FCC RF Exposure Limits

T

- · It must only be used with authorized accessories and antennas.
- The operator must ensure that the minimum safe distance of 0.9m (35 inches) between persons and the antenna is not exceeded during transmissions
- · Do not exceed a duty cycle ratio of 50% transmit mode to stand-by or receive modes. The radio is in transmit mode when the PTT key on the microphone is pressed and the TX indicator shows in the display window.
- DANGER: SWITCH THE RADIO OFF Additional Safety AT PETROL FILLING STATIONS Warnings

radio:

- DANGER: SWITCH THE RADIO OFF IN THE VICINITY OF EXPLOSIVE DEVICES (such as in a guarry that uses blasting techniques)
- Use of a handheld microphone or a radio while driving could contravene the legislation that applies in your country or state. Please check the vehicle regulations of your own country.

## Getting Started

Introduction Your T2020 II is controlled by a microprocessor which allows it to be configured to suit the needs of your particular fleet.

> This User's guide provides only a brief description of the basic features of your radio. For information about the advanced features which may also be provided, a comprehensive operators' manual is available from your Tait dealer.

Switching To switch the radio on, turn the ON/OFF-On Volume knob clockwise about one-third of a

turn. You may need to finally adjust the volume when you receive your first call.

When first switched on, the radio resumes Selecting a

operation on the same channel as when it was Channel last switched off.

> To check for activity on a channel, select channel mode by pressing the Channel (()) key.

- Use the scroll keys ( end end ( nove) to move To Change through the list of available channels, or Channels
  - Use the keypad to enter a new channel number. or

• Use the keypad to enter an alphanumeric label  $(\alpha)$ 

A group is simply a collection of channels Selecting a grouped together for scanning or voting. You Group select a group in the same way as selecting a channel.

Transmit

Timer

Sending a This section explains how to make a call using vour T2020*II*. Call

- 1 Select the appropriate channel for the party you wish to contact (see "Selecting a Channel").
- 2 Check that the channel is free of traffic by observing the BUSY indicator - if it is illuminated the channel is already in use and you must wait. If your radio is preprogrammed for 'off-hook monitoring' you will hear any other traffic when you lift the microphone from its clip.
- 3 Hold the microphone about 5cm from your mouth and press the **PTT** key. Pause briefly to ensure your first word is not cut off, then speak clearly, identifying yourself and the person you wish to contact by your call signs (for example "Mobile-9 to Base"). Release the PTT key when vou have finished talking.
- 4 When you receive a reply, proceed with your conversation as described below.

**Using the** The **PTT** key on the side of the microphone **Microphone** switches the radio between transmit and receive and PTT key modes. Each time the radio transmits, the TX indicator appears in the display.

> To speak, press the PTT key and then release it to listen to the reply.

The radio is fitted with a preprogrammed timer to limit the maximum length of transmissions. When this time limit is reached, a three tone warning is sounded and transmission stops. You must release the PTT key before proceeding.

## Making a Call

Receiving a Call	Scanning	Selcall Calls	Alphanumeric Entry Mode
Receiving a Call         To be able to receive calls on a single channel, simply check that the radio has the appropriate channel selected (see "Selecting a Channel"). To be able to receive calls on several channels, see "Scanning".       Scanning         Responding Your radio remains muted until there is activity on the channel. Listen for your own call sign, and respond promptly when you hear it by pressing the PTT key and identifying yourself (for example "Mobile-9 Receiving").       Scanning         Monitor       Your 72020/// is fitted with muting facilities which ensure you are not disturbed by calls which are not clear or are not intended for you. The Monitor (Impersormed muting controls, and allows you to hear all traffic on a channel. The following table describes the use of the Monitor (Impersormed muting controls, and allows you to hear all traffic on a channel.
