To whom it may concern

TMAH5E - Beacon Distress Frequencies

The following 'Note' is part of the Users Guide and can be found in 'For Your Safety' on Page iii.

It says:

Frequency band reserved for distress beacons

Frequency band 406 to 406.1 MHz is reserved for use by distress beacons. Transmissions should not be made within this frequency band.

Your's faithfully,

A handwritten signature in dark ink, appearing to be 'Des Fox', with a stylized, looping flourish.

Des Fox
