To Whom It May Concern

**SUBJECT: Application(s) for Certification for
FCC ID: CASTMBC0A and FCC ID: CASTPDC0A**

We, Tait requested TIMCO to carry out FCC Class II permissive change certification for our mobile transceiver and our portable transceiver:

- FCC ID: CASTMBC0A
- FCC ID: CASTPDC0A

This Permissive Change is required to extend the frequency band of operation to 217-220 MHz (B Block frequencies under part 80) in addition to the 220-222 MHz (part 90) on the original FCC Grant.

We also declare that no hardware change was implemented and product is exactly the same one previously certified. The frequencies were made available via software.

Yours sincerely

A handwritten signature in black ink, appearing to read "D. Jackson".
