

EXHIBIT F: EQUIPMENT LABEL [2.925, 2.926, 2.1033(B2,7), 15.19(A3)]**LABEL EXAMPLE**

Refer to picture file “EXF_Label.pdf”

The FCC Identifier assigned to the CB2OHHL3 is FCC ID: CB2OHHL3. This number will be imprinted on the 1.0”x1.5” high temperature polyester matte white label.

The label will be placed on the exterior of the CB2OHHL3 housing using an acrylic adhesive that will permanently affix the label.

Because of the small size of the device and because the installation is inside a portion of the automobile, the following statements will appear in the user’s manual. Refer to Exhibit N for the entire text of the user’s manual.

“This device complies with Part 15 of the FCC rules and with RSS-210 of the Industry Canada. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) This device must accept any interference that may be received including interference that may cause undesired operation.

WARNING: The transmitter has been tested and complies with FCC and Industry Canada rules. Changes or modifications not expressly approved by the party responsible for compliance could void the user’s authority to operate the device.”

LABEL LOCATION

The label will be located on the exterior smooth surface of the housing containing the CB2OHHL3 Universal Garage Door Opener.

There are a variety of housing designs, the shape of which will determine the exact location of the label. For the black plastic ‘clamshell’ housing design the label will be located on the available smooth surface. For examples, refer to picture files “EXD_GMTtextbtmlbl.jpg”, “EXD_W22exttoplbl.jpg”, and “EXD_VB3extbtmlbl.jpg”.

A few assemblies do not use the clamshell case. For these assemblies the label is placed on the housing in which the CB2OHHL3 is installed. For example, in the overhead light unit the label will be located on the back side of the courtesy light assembly. Refer to picture file “EXD_VG5extbtmlbl.jpg”.
