RE: Comments of February 2, 2006
APPLICATION: CBF-LTOCU-M Control Chief Corporation

Dear Mr. Ward:

Below are the comments that you have provided regarding the application for certification referenced above. Our responses to those comments are in ***bold italic***. Many responses refer you to additional exhibit(s) which has been uploaded to the application folder at the ATCB website.

Thank you for your attention. Please feel free to contact us for any additional information that you may require.

Regards,

Gregory M. Snyder
Chief EMC Engineer, Wireless/Telco Services Manager

Brian J. Dettling
Documentation Specialist

WLL Project: 8896-9023

1) Please note that the company number (1339) does not exist in the IC data base. Please provide a corrected IC application form and label using a valid IC company number.

R. Thank you for your assistance in this: Industry Canada has directed Control Chief to add an “A” suffix to the number “1339”. Revised Form RSP100 and label documents have been supplied.

2) Please note that while the device appears to be of a low enough power not to require SAR testing when used in an occupational/controlled rf environment, rf exposure must still be addressed. Please note that it must still be justified for use in a controlled environment in order to meet this exception. Please provide an rf exhibit that show occupational use.

R. Please see the exhibit “OCU RF Exposure Information” that addresses this comment.

3) Please provide a manual that shows this device is limited to the occupational/controlled use environment.

R. A statement addressing the occupational controlled environment has been added to the revised manual on page 2-2.
