

Per discussion with the FCC, the grant has been revised to incorporate the following grant notes:

"Power output listed is at the antenna connector. Only the 1/4 wave stubby antenna tested with the device as shown in the filing may be used with this transmitter. Use of any other antenna(s) requires a class 2 permissive change. The antenna(s) must be installed to provide a minimum separation distance of at least 2.5 cm from all persons. Users and installers must be provided with antenna installation instructions and transmitter operating conditions for satisfying RF exposure compliance."
