RE: Control Chief

FCC ID: CBT-3SPDT1-450

After a review of the submitted information, I have a few comments on the above referenced Application.

- 1) During your last set of uploads, confidentiality was checked for tuning procedure, amplifier schematic, external and internal photographs. Earlier uploads marked the block diagram, part list (BOM), and schematics as confidential. The letter requesting confidentiality does not match all the files checked. However, the FCC will only grant confidentiality on the schematics (TX and amplifier sections), block diagrams (which includes a short theory of operation) & parts list. The new operational description provided does not contain any confidential information and was not checked as confidential. Please submit a new letter requesting confidentiality for only the schematics, block diagrams, and parts list. All other documentation will be considered public.
- 2) One of the internal photographs provided that appears to mount behind the antenna seems to contain a shield. Please provide photographs of this board with the shield removed.
- 3) The users manuals statements will still need to contain the following statements.  
**CAUTION STATEMENT:**  
To comply with FCC RF exposure compliance requirements, a separation distance of 2.5 cm must be maintained between the antenna of this device and all persons.

Timothy R. Johnson  
Examining Engineer

The items indicated above must be submitted before processing can continue on the above referenced application. Failure to provide the requested information may result in application termination. Correspondence should be considered part of the permanent submission and may be viewed from the Internet after a Grant of Equipment Authorization is issued.

Please do not respond to this correspondence using the email reply button. In order for your response to be processed expeditiously, you must submit your documents through the AmericanTCB.com website. Also, please note that partial responses increase processing time and should not be submitted.

Any questions about the content of this correspondence should be directed to the sender.
