RE: FCC ID: CBFFLYMT1-433

Attention: Brian Haghtalab

I have a few comments on this Application.

- 1 Your 731 states that you wish confidentiality, however, no letter requesting confidentiality has been provided. Please provide a letter requesting confidentiality specifically mentioning those parts to be confidential. Remember, only certain items can be held confidential. These include block diagrams, schematics and theories of operation.
- 2 The users manual contains none of the required FCC statements. Please provide a corrected users manual that contains the statement as required in 15.21 ( Information to user. - The users manual or instruction manual for an intentional or unintentional radiator shall caution the user that changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment).
- 3 Neither the report nor other documentation give the intent or purpose of this device. Where will this device be used and for what purpose?

A handwritten signature in black ink that reads "Dennis Ward". The signature is cursive and fluid, with "Dennis" on the top line and "Ward" on the bottom line.

Dennis Ward

The items indicated above must be submitted before processing can continue on the above referenced application. Failure to provide the requested information may result in application termination. Correspondence should be considered part of the permanent submission and may be viewed from the Internet after a Grant of Equipment Authorization is issued.

Please do not respond to this correspondence using the email reply button. In order for your response to be processed expeditiously, you must submit your documents through the AmericanTCB.com website. Also, please note that partial responses increase processing time and should not be submitted.

Any questions about the content of this correspondence should be directed to the sender.
