FCC Class II Permissive Change Request Letter

FCC ID: CCECMX-ZG03

Original Grant Date: 05/17/2017

To Whom It May Concern:

We are submitting an application for the class II permissive change to the FCC approval.

1. The transmitter(FCC ID: CCECMX-ZG03) is originally approved by FCC with the frequency range of 2405~2480MHz. And we changed it's frequency range to 2405~2475MHz.
The channel 26(2480MHz) is disabled by software.
2. This Class II permissive change is adding 2 new host devices which will adopt the module, CCECMX-ZG03.

The module will be installed onto the host devices listed as below.

Manufacturer	Model
COMMAX Co., Ltd.	CIOT-700M
COMMAX Co., Ltd.	CIOT-1020M

Note: These host devices, CIOT-700M and CIOT-1020M are containing FCC certified module other than CCECMX-ZG03. The FCC certified module in CIOT-700M and CIOT-1020M is WiFi module, FCC ID: CCEW8188R511K. We confirm that this FCC ID: CCEW8188R511K module is in identical condition as it's initial FCC approval and there was no modification applied to it.

Lastly we confirm that both of host devices comply the FCC rules.

Should you have any questions, please contact us.

Sincerely,

Name: Ji-Soo KIM
Title: Principal Research
