FCC Class II Permissive Change Request Letter

FCC ID: CCEEZ-HS301

Original Grant Date: 04/05/2019

To Whom It May Concern:

We are submitting an application for the class II permissive change to the FCC approval. The sole purpose of this Class II permissive change is adding power supply regulator board. The board will serve to ensure the device will comply with Part 15 requirements by supplying stable power. Please refer to the schematic for technical configuration of additional power supply regulator board.

The module was approved as the limited modular for it's initial grant. Since the module has regulator board now, we wish to change the limited modular permission to singular modular permission.

Lastly, we confirm that there was no modification applied this FCC ID: CCEEZ-HS301 module is in identical condition as it's initial FCC approval and there was no modification applied to it other than an additional board.

Should you have any questions, please contact us.

Sincerely,

Name: Ji-Soo KIM
