Regarding FCC ID label placement for the Model 738Zplus, FCC: CCKPC0137R2 application, DMP wishes to print the information directly onto the device printed circuit board. This location will ensure the end user is always able to view the information before operation. The identifier will be readily viewable upon installation and each time the cover is removed.

The equipment is sold and required to be mounted before operation thus exposing the information before operation. This location will help ensure the longevity of the information as this equipment may be in service in harsh environments.

Best Regards,

A handwritten signature in black ink, appearing to read 'Brad Tucker', is written below the text 'Best Regards,'.
