

April 30, 2013

Regarding FCC ID label placement for this application, DMP wishes to place the label inside the enclosure lid. This location will ensure the end user is able to view the label before operation. The identifier label will be readily viewable upon installation and each time the cover is removed. The equipment is sold and required to be mounted before operation thus exposing the label before operation. This location will help ensure the longevity of the label as this equipment may be in service in harsh environments.

Best Regards,

A handwritten signature in black ink that reads 'Terry Shelton'. The signature is written in a cursive, flowing style.
