

July 12, 2017

Regarding FCC ID label placement for the PC-0198, DMP wishes to place the label inside the enclosure lid. This location will ensure the end user is able to view the label before operation. The identifier label will be readily viewable upon installation and each time the cover is removed. The equipment is sold and required to be mounted before operation thus exposing the label before operation. This location will help ensure the longevity of the label as this equipment may be in service in harsh environments.

Best Regards,

A handwritten signature in black ink, appearing to read 'Brad Tucker', is written in a cursive style.
