Columbia, Maryland 21046

Subject: Attestation of Testing and Continuing Compliance for the
TN 200 Navigation Receiver

To Whom It May Concern:

Trimble Navigation Limited hereby states the the Trimble Navigation Limited TN 200 Navigation Receiver has been tested in accordance with the requirements contained in the appropriate Commission regulations. To the best of my knowledge, these tests were performed using measurement procedures consistent with industry or Commission standards and demonstrate that the equipment complies with the appropriate standards. Each unit manufactured, imported, or marketed, as defined in the Commission's regulations, will conform to the sample(s) tested within the variations that can be expected due to quantity production and testing on a statistical basis. In addition, based on the limited tuning range of this receiver (equal or less than 335 MHz) this device is compliant with the transitional provisions of §15.37.

I further certify that the necessary measurements were made by Professional Testing (EMI) Inc. of Round Rock, Texas. A copy of the test report resulting from these measurements is on file at Trimble Navigation Limited's Austin Texas facility and is available for review on request.
