

EXHIBIT 1

CFS8DL5804E

Functional Description.

The 5804E is a battery powered portable transmitter and is part of a wireless alarm system. It is used in conjunction with a receiver (5881) to allow remote control of the alarm system. It is possible to "arm", "disarm", or raise a panic alarm in the system using the 5804E

These messages are transmitted at 345Mhz +/-82Khz using on-off keyed AM modulation.

The 5804E does not send a regular supervision or check-in message, it sends no other messages except those which are manually initiated control messages.
