

Section 15.231(c) states that the bandwidth of the emission shall be no wider than 0.25% of the center frequency for devices operating above 70 MHz and below 900 MHz. For the occupied bandwidth measurements the spectrum analyzer was set as follows: RBW = 100kHz, (This is in accordance with the minimum RBW allowed by C63.4, which requires RBW greater than 5% of the FCC required occupied bandwidth spec of 0.25% of center frequency)

OCCUPIED BANDWIDTH (443 KHz)
