

## 5818MN FCC Cover Letter

To Whom It May Concern:

The block diagram and schematic of the 5818MN 'Lead Free' is Identical to the original 5818MN. The difference is in the use of lead free parts in the 5818MN 'Lead Free' so that it may be designated as "RoHS compliant". Some component values have changed. These component value changes are allowed under the FCC's 15.231.
