

EXHIBIT 1

CFS8DL5894PI

Functional Description.

The 5894PI is a battery powered portable transmitter and is part of a wireless alarm system. The 5894PI uses a infrared sensor to indicate motion in a protected area. It is used in conjunction with a receiver (5881) indicate the motion event to the alarm system. These messages are transmitted at 345Mhz +/-82Khz using on-off keyed AM modulation. The 5894PI sends a regular supervision or check-in message, no more often than once per hour. It also sends a message initiated by the condition of the tamper switch.
