

LYNXTOUCH2 CLASS 2 PC FCC COVER LETTER

To Whom It May Concern:

This letter is to inform you of our request for a CLASS 2 PERMISSIVE CHANGE for our transceiver known as: CFS8DLLYNXTOUCH2, it will continue to be operated under Part 15.231. The purpose of this permissive change is to switch from a 2G to a 3G cellular module. Hence forth the CFS8DLLYNXTOUCH2 will only operate with a 3G cellular module. The previously certified CFS8DLLYNXTOUCH1 will still be available for those customers wishing to operate with a 2G cellular module. There were no changes in the 344.94 MHz emissions, occupied bandwidth, or line conducted class B emissions. There was an increase in class B radiated emissions as shown in exhibit 5-5 and the MPE exhibit has been recalculated for the 3G cellular module.

Regards,

X

Kenneth Eskildsen
