CFS8DLSIXSMOKE FCC COVER LETTER

Date: 10/03/2019

To Whom It May Concern:

This letter is to inform you of our request for a new certification for our transceiver known as CFS8DLSIXSMOKE. The transceiver will operate under Part 15.247.

It was determined that Antenna 2 path yielded the highest output power and utilized the highest gain antenna. As such, radiated testing was performed on Antenna 2 only since the dual antenna arrangement is for diversity only.

Regards,
