CFS8DLWLE200N2 CLASS 2 PC FCC COVER LETTER

Date: 06/20/2014

To Whom It May Concern:

This letter is to inform you of our request for a CLASS 2 PERMISSIVE CHANGE for our transceiver known as: CFS8DLWLE200N2, to extend its limited modular approval to new host CFS8DLTSSCBASE. CFS8DLTSSCBASE will continue to be operated under Part 15.231. There were no changes in the 344.94 MHz emissions, occupied bandwidth, line conducted class B emissions, or class B radiated emissions. The MPE exhibit has been recalculated for the WLE200N2 module, and reflects the option to operate the module with a lowered maximum power that is non-user adjustable and which is set by non-user accessible firmware.

Regards,

x Mark Schmidt
