Subject : Several model numbers FCC ID: CGDCONVEXSM

Dear Mrs. Bosley,

The Convexs MD80FG as mentioned in the test report with number "12_11022301.fcc01_Nedap_Convexs_MD80FG_Testreport_FCC-IC CGDCONVEXSM.pdf" is one of the models of the Convexs M80 series. With regard to radio the Convexs M80 series consists of a 13.56 MHz transceiver and is able to read 13.56 MHz Mifare cards.

Another card that can be read by the Convexs M80 is also operating on 13.56 MHz is called the DES (=Data Encryption Standard) fire card. This card has more security on board. To read this type of card a firmware change in the Convexs M80 is needed.

We market models in two color types : Gray (=G) and Charcoal (=C). We deliver surface mounted - (no letter) and Flush (=F) devices, see pictures below.

The model numbers of the different types of devices are:

1. 13.56 MHz Mifare readers
Convexs M80C, Convexs M80G, Convexs M80FC and Convexs M80FG.
2. 13.56 MHz DES readers
Convexs MD80C, Convexs MD80G, Convexs MD80FC and Convexs MD80FG.

For example: MD80FG: M=Mifare, D=DESfire, F=Flush and G=Gray

We, N.V. Nederlandsche Apparatenfabriek "Nedap", declare that the model that has been tested and mentioned in the test is a representative model of the Convexs M80 series regarding FCC radio testing.

I thereby wish to request whether you can authorize us to apply the same FCC ID: CGDCONVEXSM to all the model numbers mentioned above.

I hope you can honor our request

Best regards,
N.V. Nederlandsche Apparatenfabriek "Nedap"
Jacques Hulshof
