Subject : Several model numbers FCC ID: CGDINVEXS170

Dear Mrs. Bosley,

The Invexs MDK170B as mentioned in the test reports with number "12_12050901.fcc01_INVEXS_Report CGDINVEXS170.pdf" is a low power communication device operating on 13.56 MHz.

There are several models of devices that are electrically, radio and hard ware wise the same only the names and the software in the models differ:

1. Model : INVEXS MDK170B,
2. Model : INVEXS MDK170W,
3. Model : CUBE Card reader MK170B,
4. Model : CUBE Card reader MK170W,
5. Model : CUBE Card reader MDK170B,
6. Model : CUBE Card reader MDK170W.

The letters stand for M=Mifare, D=DES and K=Keyboard.

DES stands for Data Encryption Standard card. This card has more security on board.

We market models in two color types : Black (=B) and White (=W).

Because the card readers are also used by "CUBE" group within our company, they produced their own names but the letters and figures behind "INVEXS" and "CUBE Card reader" have the same meaning and there for are the same products.

We, N.V. Nederlandsche Apparatenfabriek "Nedap", declare that the model that has been tested and mentioned in the test reports is similar as the models mentioned above regarding radio testing.

I thereby wish to request whether you can authorize us to apply the same FCC ID: CGDINVEXS170 to all the model numbers mentioned above.

I hope you can honor our request

Best regards,
N.V. Nederlandsche Apparatenfabriek "Nedap"
