flexdesk

a new self-service experience

the flexdesk provides your library with a new self-service experience. it contains a barcode, mifare or rfid reader to identify the user, an rfid-reader for the check-in/out process and a touch screen for user interaction. additionally, the flexdesk contains a printer for the receipts.

check-in and check-out

The Flexdesk can function as a check-in, check-out or combi station. This way you can facilitate the whole lend and return process with just one desk. The Flexdesk is equipped with a table-top reader. The reader is produced in such a way that only items that are on top of the antenna are processed.

user-friendly

Because of the use of touch screens and user-friendly software, the Flexdesk can easily be used by all ages. It enables the user to lend out and return books by completing a few simple steps.
