Intended use

The Smart Deactivator model: SMART DEACT is an Electronic Article Surveillance (EAS) system intended to be used in stores at check-out counters for deactivating 8.2MHz anti-theft alarm tags.
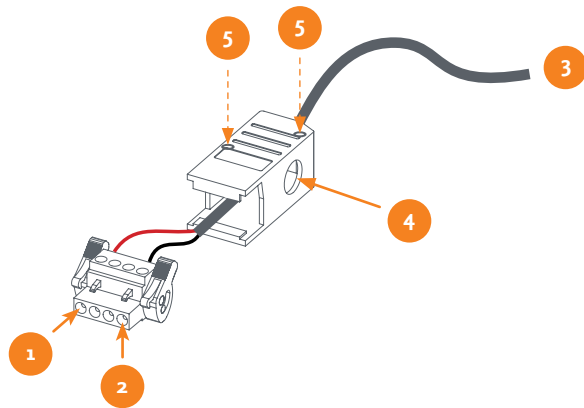

⚠ Warning

This equipment should be installed, operated, serviced, and repaired by skilled personnel only. The installation and interconnection of this equipment to facility wiring and other equipment must be done by a competent, skilled craftsperson who is familiar with applicable standards and codes governing the installation. Installation methods, practices or procedures that are unauthorized or done improperly are dangerous and could result in serious personal injury or damage to property and equipment.

FCC and ISED Compliance statement

This device complies with part 15 of the FCC Rules and this device contains licence-exempt transmitter(s)/receiver(s) that comply with Innovation, Science and Economic Development Canada's licence-exempt RSS(s). Operation is subject to the following two conditions:

(1) this device may not cause harmful interference, and

(2) this device must accept any interference received, including interference that may cause undesired operation.

Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

Cet appareil contient des émetteurs / récepteurs exempt (s) de licence qui sont conformes aux RSS(s) exemptes de licence d'Innovation, Sciences et Développement économique Canada. L'opération est soumis aux deux conditions suivantes:

(1) cet appareil ne doit causer aucune interférence, et

(2) cet appareil doit accepter n'importe quelle interférence, y inclus interférence qui peut causer une

opération non pas voulu de cet appareil. Les changements ou modifications n'ayant pas été expressément approuvés par la partie responsable de la conformité peuvent faire perdre à l'utilisateur l'autorisation de faire fonctionner le matériel.

FCC and IC Radiation Exposure Statement

This equipment complies with FCC and Canadian radiation exposure limits set forth for an uncontrolled environment. This transmitter must not be co-located or operating in conjunction with any other antenna or transmitter.

Cet équipement est conforme a CNR-102 limites énoncées pour un environne- ment non contrôlé.

This Class B digital apparatus complies with Canadian ICES-003.

Cet appareil numérique de Classe B est conforme à la norme Canadienne ICES-003.

FCC Information to the user

Note: This equipment has been tested and found to comply with the limits for a class B digital devices, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequent energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does not cause harmful interference to radio or television reception, which can be determine by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures: Reorient or relocate the receiving antenna. Increase the separation between the equipment and receiver. Connect the equipment into an outlet on a circuit different from that to which the receiver.

NOTE: Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment. To ensure compliance with FCC regulations, use only the shielded interface cables provided with the product, or additional specified components or accessories that can be used with the installation of the product.

FCC ID: CGDSMART DEACT

IC:1444A-SMARTDEACT

CE Declaration of Conformity

Hereby, Nedap N.V. declares that the radio equipment model SMART DEACT is in compliance with Directive 2014/53/EU. The full text of the EU declaration of conformity is available at the following internet address: https://portal.nedapretail.com/

Este producto tiene certificado de homologación IFT número: RCPNESM19-0026

Singapore Compliance

ISED Information to the user

This radio transmitter [1444A-SMARTDEACT] has been approved by Innovation, Science and Economic Development Canada to operate with the antenna types listed below, with the maximum permissible gain indicated. Antenna types not included in this list that have a gain greater than the maximum gain indicated for any type listed are strictly prohibited for use with this device.

Cet émetteur radio [1444A-SMARTDEACT] a été approuvé par Innovation, Sciences et Développement économique Canada pour fonctionner avec les types d'antenne énumérés ci-dessous, avec le gain maximal autorisé indiqué. Les types d'antenne non inclus dans cette liste qui ont un gain supérieur au gain maximum indiqué pour tout type répertorié sont strictement interdits pour l'utilisation avec cet appareil.

The following antenna models can be installed/connected to the Smart Deactivator.
1. *SDA-265x265*
2. *DAPL 275x275*
3. *MG9800I*
4. *NCR7878-5000*
5. *HN24-000002*

Specifications

Power Supply	100-240Vac Power adapter, 0.6-0.3A, 50-60Hz 12Vdc, 2A, 24W max.
Dimensions	185mm x 106mm x 37mm
Weight	800gr
Output Power (8.2MHz)	Max 9 dBµA/m @ 10m
Frequency Band (8.2MHz)	7.4 – 8.8MHz
Modulation	Frequency Sweep
Antenna type	Inductive loop
