Subject: Attestation of parts equality for the new version of TRANSIT ULTIMATE

To whom it may concern,

We, N.V. Nederlandsche Apparatenfabriek "Nedap", declare that the following product:

FCC ID : CGDTRANSITULT2  
IC : 1444A-TRANSITULT2  
Brand : Nedap  
Model : TRANSIT ULTIMATE  
Description : Long-range vehicle and driver identification reader operating on 2.45 GHz, 433 MHz and 120 kHz

Is the updated version of the previous product with

FCC ID : CGDTRANSITULTI  
IC : 1444A-TRANSITULTI  
Brand : Nedap  
Model : TRANSIT ULTIMATE  
Description : Long-range vehicle and driver identification reader operating on 2.45 GHz, 433 MHz and 120 kHz

Where the 2.45GHz part is modified to such extend that a new application for FCC and ISED was mandatory.

The 120kHz part and the 433MHz part are located on different PCBs and have not been changed in any way in hardware as well as software. Also the mechanical housing is identical to this previous version.

The original test reports are of an expired version of RSS-210 issue 8. Now issue 9 is in force. However the technical requirements between these two test specification versions for the 433MHz and 120kHz parts are not different.

Therefore we state that the measuring results of the 120kHz part and 433MHz part are still representative of, and valid for the updated version.

We also acknowledge that the FCC/ISED ID numbers stated in the reports are not those of the updated device, but that the reports are being used to support the certification of this application.

Best regards,  
N.V. Nederlandsche Apparatenfabriek "Nedap"

  
Reinold Hubers  
Compliance Manager
