To whom it may concern,

we

Nedap N.V.

hereby declare the following:

FCC ID: CGDVP4002
IC: 1444A-VP4002
Manufacturer: Nedap N.V.
Brand: Nedap
Model: VP4002

The item is not labeled with a FCC ID nor IC ID as it is considered to be too small and impractical to place those ID's. Instead the FCC ID and IC ID are placed in the manual as per:

KDB 784748 D01 General labeling and Notification v09r01 of july 2, 2018:
When the device is so small, or for such use that it is impracticable to label with a font size that is fourpoints or larger (and the device does not utilize electronic labeling), then the FCC ID shall be placed in the user manual, and the FCC ID shall also be placed either on the device packaging or on a removable label attached to the device.
And per Canadian RSS-Gen

4.1 General
In addition to complying with the applicable RSSs and RSP-100, each unit of a product model (i.e. of a radio apparatus) shall meet the labelling requirements set out in this section prior to being marketed in Canada or imported into Canada.
If the dimensions of the product are extremely small or it is not practical to place the label or marking on the product, and if electronic labelling cannot be implemented, the label shall be placed in a prominent location in the user manual supplied with the product, as agreed upon with ISED prior to the certification application. The user manual may be in an electronic format; if it is not supplied to the user, the user manual must be readily available.

Label as placed on the packaging:

Best regards,

Nedap N.V.
