

Operational Description

FCC ID: CH8A90427XXX-07

The Westell TriLink™ Gateway combines the functionality of a Voice over (VoIP) Analog Terminal Adapter with that of a Wetell® ADSL Gateway. The TriLink™ Gateway enables a connection an analog phone to the Gateway to make or receive phone calls over the Internet, and supports the networking interfaces such as wireless 802.11b/g, ADSL, and Ethernet. The Gateway also functions as a 4-port Router.

The 2.4 GHz antenna has a reverse polarity SMA connector on it. The antenna used is a 2 dBi monopole.
