Re: FCC ID CHPLBD-25200  
731 Confirmation Number EA210636

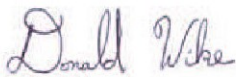

Mr. Lyles,

In reference to correspondence # 29778, Thales had listed the photographs as confidential, only to restrict access to general public; due to the competitive nature within the industry. Thales highly regards it's intellectual property as a valued asset, however, we do recognize that once sold this product is available for viewing and examination by our customers and inevitably by competitors. Minimizing such access was our original justification for the request.

We hereby waiver that confidential request and would like to inform the processing branch to proceed as normal with regards to confidential photos submitted. We are hopeful this will allow processing without further delay.

If further information is required, please contact me at (413) 998-1151.

Respectfully Submitted,

---

Donald Wike  
Manager, Low Power Product Development  
Thales Broadcast & Multimedia Inc.
