KEY POSITION.pdf
(2 MB)

Dear Mike,

Please refer to attached file which indicates the key position on the transmitter and the PCB. The function of the button near the dip switch is the "REV" key which controls the fan to turn it's direction.

Best regards,

S. S. Liou
Engineer / EMC Dept. II
Electronics Testing Center, Taiwan

Question #1: In the schematic diagram, it shows total of 7 push-push buttons but in the internal photos, there are total of 8 push-push buttons. Please explain.

Question #2: Last photo in the page 2 of external photos, please explain what is the purpose of button near the dip switch.

Best Regards

Mike Kuo

The items indicated above must be submitted before processing can continue on the above referenced application. Failure to provide the requested information within 30 days of the original e-mail date may result in application dismissal and forfeiture of the filing fee. Also, please note that partial responses increase processing time and should not be submitted. Any questions about the content of this correspondence should be directed to the e-mail address listed below the name of the sender.
