

This REMOTE controller is designed to separately control your TV, VCR, DVD, Cable/Satellite and Fan (light and speed). For TV, VCR, DVD and Cable/Satellite modes, the infrared signal is employed. Only ceiling fan speed and light brightness is controlled by using RF signal.

The “L” button will control the light brightness and on or off. The “HI” / “MED” / “LO” buttons will control the fan speed. The “OFF” button will turn off the fan.
