

To whom it may concern:

In reference to Satellite 1800 testreport 2-2509-A/01 dated on 04-26-2001 issued by CETECOM ICT Services GmbH

We,

**Toshiba Europe GmbH
Hammfelddamm 8
41460 Neuss
Germany**

with regard to the used frequency range TOSHIBA hereby declare the following:

The software which has been used for testing the wireless LAN application offers the possibility to operate the system in the frequency range which is mainly allocated for these kind of applications worldwide. This means in addition that it is special kind of test software which is not available in terms of any commercial distribution.

In contrast to that, the commercial wireless LAN software will just offer to the user the possibility of having 11 channels in the frequency band from 2412 to 2462 MHz available as it is stated inside the user's manual provided by Toshiba.

Date: 30. May 01
