Hi, Mike,

Attached please find additional document to address section 15.407 (g) frequency stabilities requirement.

Thanks,

Anne

Hi Mike,

Here are the answers from client.

Question #1: Test report or the theory of operation did not provide technical information to address section 15.407 (g) frequency stabilities requirement. Please provide the information.

<answer> We describe frequency usage on attached manual (revised).

Question #2: User Manual does not contain information to address 15.407(e) requirement to restrict the device for indoor use to avoid interference to c-channel MSSS operation. Please provide revised user manual to comply this requirement.

<answer> pls see the attached user's manual and information sheet to user.

Thanks,

Claire Hoque
