**Evaluation of Japan Radio Co. Ltd Marine VHF Transmitter
FCC id: CKEJHS-780D**

I have assessed the above referenced submission for the JRC and found it to be compliant. The product is a VHF Marine radio transmitter with DSC.

The following points were noted and resolved during the evaluation.

1. Agent's letters

The agent's letter and letter of attorney did not nominate individuals within the JRC and TUV companies who were responsible for handling the submittal. Revised letters were received from the applicant for both agencies.

2. The user manual that was originally supplied contained only part of the complete manual and had no reference to RF exposure requirements. A complete manual was later submitted.

3. There was no tune-up information in exhibit 10. The applicant subsequently provided a letter stating that there were no user accessible parts that could be adjusted to change the factory settings.

Yours sincerely

A handwritten signature in blue ink that reads 'T. J. Twynam'.
