**Re:** FCC ID CKEJSS-296  
**Applicant:** Japan Radio Company  
**731 Conformation Number:** EA391747

Mr. Leimer,

I was a little uncertain of the question you posed to me regarding the occupied bandwidth of the three emission designators. If I understand what it is you want, then my response to the FCC is this:

For all three emission modes, (J3E, A1A, and F1B), the occupied bandwidth is from 1.619Mhz to 26.175MHz as well as 2182KHz and 2187KHz. Please see the attached pdf file labeled "JSS296 Occupied Bandwidth Test Results". I believe this should satisfy your requirements.

If I have not provided you with the correct information, or I can be of any further assistance to you, please feel free to contact me personally.

With Best Regards,

Eric D'Ancicco
