Hi Mike,

#1: The transmitter's FCC ID is CVTTP7750H.

#2: "Cohere plot" means disposition of measurement tools in a simple drawing as shown on the bottom page of the test report, page 14. Therefore no test data available.

Should you have any questions, please let us know.

Have a happy weekend.

Best regards,  
Minori  
Nikko

Hi Minori:

Question #1: What is the FCC ID number of the transmitter that will be used with this receiver ?

Question #2: Page 14 of test report indicates there is cohore plot included in the test report. I could not locate such test data, please provide it.

Best Regards

Mike Kuo
